

September 8th: Introducing: Painting and Plaster Repair

Like any home over a period of time, plaster will crack, become loose or even crumble. Our church home and specifically our sanctuary is no exception. One of the areas that our upcoming projects will address is painting and plaster repair. Church Interiors provides a very detailed service when it comes to plaster repair. Not only will we see these areas repaired but fresh new coats of paint in our sanctuary along with our Sanctuary foyer, stairwell, balcony, balcony walls, ceiling will also be painted. Should there be any loose caulking around the trim, this will be recaulked as well.

In addition our maintenance projects will see all existing wood cleaned and lightly sanded. A blending stain will then be applied and a coat of water-based polyurethane will be applied for permanent protection. This will be one of the most time consuming projects for Church Interiors.
