

Introducing Pew Cushions

Is there such a thing as a comfortable pew? While that question has been debated for centuries, we do hope that our members will find our new pew cushions more comfortable than what currently exists! Our new pew cushions will be 2" thick and carry with them a 15-year warranty against defects in workmanship and materials. The cushions are sewn together using French seams with nylon thread. The pew cushions will have tufting buttons, which are necessary to prevent seam slippage. These pew cushions are also reversible! Plans are to have a "Lovefeast" side (that will absorb those coffee and hot wax spills that happen around Christmas) and a side we use for our regular worship services. We have chosen a beautiful fabric that will be introduced on October 27th with our lightly refinished pew.
