

Introducing Pew Refinishing

We plan to do a light refinishing of our church pews. This will take place "on site" so are pews will remain here at Christ Moravian Church while this takes place. This light refinishing process is a permanent finish that is intended to enhance the existing finish and protect the pews for years to come. Three coats of finish will provide a more durable finish than a process like "Old English." The finish will be hand wiped which will be smoother than a brush painted finish. Light refinishing costs 20% less than the cost of complete refinishing and our pews do not require a complete refinishing. The color will not change. In addition the chairs on the chancel area, communion table, podiums and pulpit will also be lightly refinished.

We will have a sample pew done prior to the process beginning so we will be to see for ourselves the end result beforehand.
